Skill Spreads

Skill spreads is a platform Where a registered user can follow, comment, rate, add books and parellely follow friends also.

Actually this was thought for the technical and stuff but due to data availability, We have used novels as books.

This project is entirely built using :

1. Angular 2

2. FIrebase as a database.

3. Semantic as a framework.

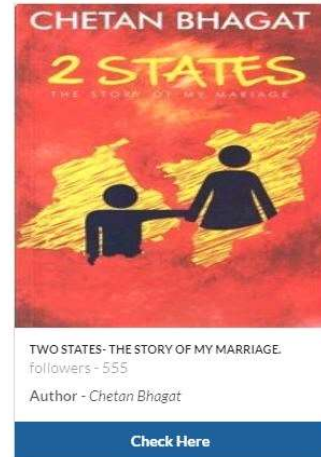

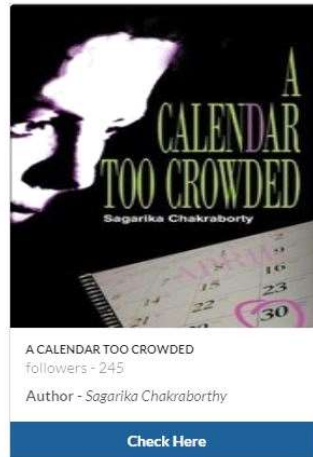

Steps for installation:

1. Download the zip or clone the repository.

2. Unzip the file and "npm install" for node modules installation.

3. "ng serve" to see the website.

4. You can signup with either google or normal signup form.

5. Or use the following credentials-

      email: rohith@gmail.com

      pass: rohith
